

Acture Solutions to Acquire Digital Back Office

ALBANY, NEW YORK – October 6, 2026 – Acture Solutions (“Acture” or the “Company”), a leading managed service provider serving regulated end markets across the Northeast, today announced an agreement to acquire Digital Back Office. The acquisition deepens Acture’s core capabilities, increases market density, and advances the Company’s strategy of building a specialized MSP in highly regulated industries.

Founded in 1991, Digital Back Office is a Connecticut-based managed services provider and internet service provider serving K-12 municipalities, schools, and commercial clients across the Northeast. The Company delivers mission-critical network infrastructure and connectivity solutions, including managed wide-area network ("WAN") services, broadband access, cybersecurity, network design, monitoring, and IT support. It provides end-to-end network management by combining leased fiber connectivity, internet access, and managed security solutions into a comprehensive service offering.

“Digital Back Office has built an outstanding reputation as a trusted technology partner to K-12 school districts and municipalities across Connecticut and beyond,” said Gabriel Stacy, Chief Executive Officer of Acture Solutions. “Their technical expertise, customer-first culture, and long-tenured relationships make them an exceptional fit for Acture. Together, we’ll be able to offer our customers an even more comprehensive offering spanning network connectivity, managed IT, and cybersecurity solutions, while continuing to deliver the high-touch service we’re both known for.”

“I am incredibly proud of the business we’ve built over the past three decades and the trusted relationships we’ve established with our customers,” said Ron Richtarich, CEO of Digital Back Office. “Joining Acture marks an exciting next chapter – we share a commitment to exceptional customer service, technical excellence, and supporting local institutions,” said Francisco Palacio, President of Digital Back Office. “And I firmly believe that both our customers and employees will benefit from the additional resources and broader capabilities of the combined organization.”

Stacy continued, “This transaction, which follows our strategic growth financing from Stonepeak Credit and acquisition of Artilus earlier this year, represents another important milestone in Acture’s long-term strategy of building the premier managed services platform serving highly regulated end markets. We are excited to welcome the Digital Back Office team to Acture and look forward to investing in our combined capabilities to better serve our customers for years to come.”

The transaction closed in the second quarter of 2026. Bank Street Group LLC served as exclusive financial advisor and Stinson LLP served as legal advisor to Acture Solutions. martinwolf served as financial advisor to Digital Back Office.

About Acture Solutions

Founded in 1984, Acture Solutions provides Managed IT and Cybersecurity Services that protect and guides community-focused organizations.
